

E.L. Haynes Public Charter School
Washington, DC

Photography: Maxwell MacKenzie

This 50,000 square foot Charter School for 475 pre-K through eighth grade students is designed to be open and inviting to the surrounding urban neighborhood. Lighting fixtures were selected and organized to emphasize the exposed building structure and systems that characterize the space. The lighting strategy asserts the school value of communication with the surrounding context by creating an inviting nocturnal image of transparency and warmth.
