

Central Plaza, Maryland Zoo
 Baltimore, MD

O'Doherty Group Landscape Architecture

As a major renovation, the new Central Plaza is intended to be a flexible space capable of hosting anything from musical venues to gala fundraisers. A mixture of ambient and accent light integrated into key elements such as the gazebo and "Lighting Totems" would be visible both at night and by day. Concealed light in landscape features such as benches, water features, and pavers is conceived to be animated.
