

Two Rivers Public Charter School  
Washington D.C.

Shinberg Levinas

46,000 square square foot renovation and third-storey addition transformed a two-storey industrial warehouse into classrooms, break-out rooms, special art and music space, interior recreation areas, larger spaces for assembly, and an array of administrative and teacher-support for pre-K through third-graders. As the atrium space served multiple functions and was visually connected, a two source, double switched lighting solution was employed.
